AES HEALTH PRO

SECURITY BASICS

As security systems become more and more complex, monitoring of these systems becomes more challenging. One incident, whether it be a complete failure, a slowdown or the reporting of incorrect data, can put your organization at risk. Health Pro overcomes these obstacles by proactively monitoring any device on your network twenty four hours a day / seven days a week. We uniquely configure your system to send appropriate alerts and notifications when certain thresholds are hit making it easy to monitor all your devices and ensuring everything is functioning properly.

POWER DEVICE UPTIME & STABILITY

Our technology is constantly logging and available to report the status of your power supply. Our tool assures that the system and your UPS devices deliver clean, uninterrupted power to all mission-critical security equipment. We also monitor the battery capacity of power devices. If a UPS battery run-times fall below sufficient levels or if the system experiences any power fluctuations or outages, *Health Pro* alerts your security team in real-time, empowering them to respond instantly.

Don't wait until you need video to find out you were never recording it to begin with.

THESE INCLUDE:

Cameras, Work Stations, Servers, NVR & DVR

- Ping
- CPU Load
- Drive Space
- Windows Services per server
- Available Memory
- Bandwidth
- Uptime & HTTP
- NIC Bandwidth Switch

Driving Security Innovation

VIDEO RELIBILITY

Health Pro informs you right away if part or all of the surveillance system might or has failed. **Health Pro** continuously alerts you of real-time issues so that you can respond proactively and immediately

Surveillance System Monitoring Benefits

Uptime: ensures that surveillance cameras are online and functioning normally.

Delivery: confirms that video streams are actually sending data and warns if and when networks are behaving abnormally and could potentially fail or have already failed.

Compliance: stores real-time and historical data about the performance of your surveillance system. Your team can access performance and compliance reports on demand as well as review daily, monthly, quarterly, and yearly summaries.

ADDITIONAL BENEFITS

✓*Improved Security and Efficiency:* automates time-consuming tasks and delivers real-time, holistic visibility to your mission-critical devices. With the correct alerts, your security team can expect to use fewer resources to ensure their companies' security system is operational and functioning with optimal performance.

✓*Critical Infrastructure Protection and Compliance*: Use **Health Pro** software to monitor security systems, guarantee uptime and streamline compliance reporting in real-time. Our tool helps companies ensure and report compliance as defined by industry mandates and regulations.

✓*Rapid Troubleshooting:* Having all the data on a single dashboard provides you with instant visibility to assess and diagnose operational issues.

✓*Business Analytics: Health Pro* drives better business and physical security infrastructure decisions for your company's capacity planning and system performance. Your security team always knows when devices approach the end of their life cycles and need replacing.

AES ADVANTAGE

AES is New York's largest privately held Systems Integrator. AES' track record of developing solutions for a wide range of customers has given us the opportunity to gain deep insight into key industries and business sectors. Consequently we provide a comprehensive array of solutions which include: Access Control, Fire & Life safety, Datacomm, Intercom, DAS, ARCS, Covert & TSCM, IP Video, Cyber Security and Health Monitoring
